ID: 402-1132782-6 **Work permit:** Dominican (Dominican Republic) **Gender:** Male **Date of birth:** 24/10/2000 **Place of birth:** Santiago de Los Caballeros, Dominican Republic **Nationality:** Dominican (Dominican Republic)

ABOUT ME

Senior Full-Stack Developer with experience in the architecture and development of scalable web and mobile solutions for high-performance, mission-critical environments. Expert in **JavaScript, React, Next.js, Flutter (Dart), Node.js, and cloud architectures**, with a proven track record of optimizing performance, improving user experience, and delivering products that generate measurable value. Capable of leading **end-to-end projects**, reducing technical debt, implementing **DevOps practices**, and collaborating with global teams in **agile environments**. I enjoy working on products from **idea to production**, combining **mobile, web, and backend development** to create useful and scalable technological solutions.

WORK EXPERIENCE

Vamos Rural

City: Santander | **Country:** Spain

[01/07/2025 – Current] **Chief Engineer**

At **VamosRural**, I collaborate as a **freelance contributor** in the development of various technological projects, delivering **scalable solutions focused on user experience**.
I currently work in both **mobile and web development**, using technology stacks such as:

- **Flutter and React Native** for cross-platform mobile application development.
- **React** for building modern and dynamic web interfaces.
- **MongoDB and MySQL** for database design, modeling, and management.

My role spans from **designing technology architectures** to **implementing features**, with a strong focus on **process optimization and ensuring software quality**.

AppMyPets

City: Las Palmas de Gran Canaria | **Country:** Spain

[15/07/2025 – Current] **Full Stack Developer**

At **AppMyPets**, I collaborate as a **freelance developer** on the development of a **mobile and web platform** that digitalizes pet management and facilitates the planning of **pet-friendly travel and experiences**.

I work across the **entire technology stack**, transforming product ideas into real features used by users.

Key Contributions

- **End-to-end development** of features for web and mobile applications.
- Implementation of a **certified digital pet passport system**.
- Development of a **vaccine tracking and reminder system**.
- Creation of an **interactive map of pet-friendly locations**.
- Development of a **pre-check-in system for traveling with pets**.
- Continuous improvements in **performance, scalability, and user experience**.

[13/03/2026 – Current] **Chief Technology Officer (CTO)**

After my time as a Full Stack Mobile & Web Developer, I was promoted to CTO to lead the technology strategy and product vision for AppMyPets. My main objective is to ensure that our web and mobile architecture scales efficiently, while we continue to digitize pet management and revolutionize pet-friendly experiences. I work at the intersection of business and technology, ensuring that every development decision translates into real and valuable functionality for our users.

Key Responsibilities and Achievements:

Technical and Strategic Leadership: Directing the software architecture and making decisions about the technology stack (web, mobile, and backend) to ensure performance and scalability.

Product Vision (End-to-End): Overseeing and continuously developing our ecosystem, from initial concept to production deployment.

PetTech Innovation: Providing technical leadership for the implementation of the certified digital pet passport, pre-check-in systems for travel, and vaccination tracking tools.

Ecosystem Optimization: Continuous improvement of the user experience and infrastructure, including the evolution of our interactive map of pet-friendly places.

Active Labor Solutions SRL

City: Sosua | **Country:** Dominican Republic

[01/01/2025 – Current] **Full Stack Developer**

Responsibilities: Design and develop complete web applications, from backend architecture to frontend interfaces, ensuring an intuitive and seamless user experience.

Implement and manage robust backend systems using Node.js and relational databases like MySQL, as well as integrate NoSQL databases like MongoDB for specific solutions.

Create and maintain interactive and responsive user interfaces with React, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS, optimizing application interaction and usability.

Develop and integrate efficient APIs to ensure seamless communication between backend and frontend systems. Analyze and improve the user experience (UX) through continuous testing, feedback gathering, and adjustments to application design.

Collaborate with multidisciplinary teams using agile methodologies to meet project objectives and ensure on-time deliveries. Optimize application performance to ensure fast load times and error-free experiences, both on the frontend and backend.

Marcsoftware

City: Puerto Plata | **Country:** Dominican Republic

[05/01/2020 – 15/01/2022] **Full-Stack Developer**

I **migrated CONSULSOFT**, a medical management software, to modern technologies such as **JavaScript and React**, improving its performance by **30%**. I designed and implemented strategies to ensure **seamless integration between frontend and backend**, collaborating with a **remote team**. I also ensured the **reliability and scalability** of the software.

Mapple Studios Agency SRL

City: Puerto Plata | **Country:** Dominican Republic

[15/01/2019 – 30/01/2020] **Graphic Design (UI/UX)**

I worked on several **UI/UX projects** for **Mapple Studios' clients**. In addition, I designed **graphic materials** using tools such as **Photoshop, Illustrator, and CorelDRAW**. I ensured **brand consistency** while developing **creative concepts** for client projects.

EDUCATION AND TRAINING

[01/01/2019 – 08/03/2025] **Systems Engineer**

Universidad Tecnológica de Santiago (UTESA) | <https://utesa.edu/>

City: Santiago de los Caballeros | **Country:** Dominican Republic | **Field(s) of study:** Engineering, manufacturing and construction: • *Engineering, manufacturing and construction not elsewhere classified* | **Level in EQF:** EQF level 6

CERTIFICATIONS

[Cincinnatus Institute of Craftsmanship, 13/04/2025]

Full Stack Development

I completed an **intensive Full Stack Development certification**, gaining both **theoretical and practical knowledge** in modern technologies for building **web and mobile applications**.

Frontend: HTML, CSS, JavaScript, Angular, React

Backend: Node.js, Express

Databases: SQL

Tools & Complementary Technologies: Git, Docker, TypeScript

This program focused on developing **end-to-end applications**, covering everything from **user interface development to backend architecture and database management**.

Mode of learning: Project based

[ITLA, 01/01/2024]

Diploma in Front-End Web Programming

Certificate of completion of the **Specialized Diploma in Front-End Development** from the **Instituto Tecnológico de Las Américas (ITLA)**, one of the most recognized technological institutions.

During this program, knowledge and skills were developed in **modern web interface development**, using current technologies to create **efficient and functional web applications**.

Mode of learning: Project based
